JF Series

Discontinuation of JF Series Illuminated Tactiles with Square Actuator and Full Face Illumination

Type of Change:

- ☒ Engineering ☐ Part Number
☐ Product ☐ Appearance

1. NKK Switches will be discontinuing JF Series Illuminated Ultra-Thin Process Sealed Tactiles with the square actuator and full face illumination, and will include standard and custom switches. There are no direct alternates for the discontinued switches. Part numbers for effected standard switches are on the following table.

JF Series Tactiles with Square Actuators will be Discontinued

Effected Standard Part Numbers for JF Illuminated Tactiles		
JF15AP1CC (Red LED)	JF15AP1EE (Yellow LED)	JF15AP1FF (Green LED)

Notes

Alternate options are not available for the discontinued switches.
Contact information is below if more details are needed.

Effective Dates for Change No. 1

Orders for JF Series Tactiles with the square actuator and full face illumination will be accepted through October 18, 2023. The end of sales date is April 18, 2024.

Discontinuation of KP Series Illuminated Pushbuttons with Super Bright Amber/Blue Bicolor LEDs

Type of Change:

- ☒ Engineering ☐ Part Number
☐ Product ☐ Appearance

2. The KP Series Illuminated Pushbuttons with Amber/Blue Bicolor LEDs will be discontinued, including standard and custom switches. The comparison of the LED specifications to the RGB LED as the recommended alternate is below, and comparison of typical switch dimensions are on the following two pages. Lastly, part numbers are listed for discontinued standard models, in addition to the corresponding caps with alternating legends.

KP Series with Amber/Blue LED will be Discontinued

LED Specifications Comparison

 ATTENTION ELECTROSTATIC SENSITIVE DEVICES The electrical specifications shown are determined at a basic temperature of 25°C unless stated otherwise. LEDs are an integral part of the switch and are not available separately.	Discontinued Product Bicolor Amber/Blue LED		Alternate Product Multicolor Red/Green/Blue LED

³ Values for Temperatures Greater Than 45°C			⁴ Value for Temperatures Greater Than 40°C			

Notes

The LED circuit is isolated and requires an external power source.

For best results and safe use of the LEDs, the supply voltage should be more than the LED forward voltage. In addition, an appropriately valued ballast resistor should be used. Without the ballast resistor, the LED will be damaged or destroyed. The resistor value can be calculated by using the formula shown here.

Contact information is below if more details are needed.

$$R = \frac{E - V_F}{I_F}$$

Where: R = Resistor Value (Ohms)
E = Source Voltage (V)
V_F = Forward Voltage (V)
I_F = Forward Current (A)
