UB2 Series

Changes for Super Bright Red/Green Bicolor LED in UB2 Series Pushbuttons & Indicators

Type of Change:

- ☒ Engineering ☐ Part Number
☒ Product ☒ Appearance

The Super Bright Red and Green Bicolor LEDs for UB2 Series pushbutton switches and indicators will be changing. Both standard and custom pushbuttons and indicators are included in the revision. The change will effect electrical specifications, which are compared below. Part numbers for effected standard switches and indicators are shown on page 2.

UB2 Series with Super Bright Red/Green LEDs will Undergo Changes

CHANGES TO SPECIFICATIONS FOR SUPER BRIGHT BICOLOR LEDS

The electrical specifications shown are determined at a basic temperature of 25°C. Polarity marks are on bottom of switch. The LED is an integral part of the switch and not available separately.		Super Bright LEDs are Electrostatic Sensitive			
		6CF	Before Change	6CF	After Change
	Color	Red	Green	Red	Green
Maximum Forward Current	I_{FM}	30mA 25mA for Amber	25mA 22mA for Amber	* 30mA	
Typical Forward Current	I_F	20mA	20mA	20mA	20mA
Forward Voltage	V_F	2.1V	3.5V	2.3V	3.2V
Maximum Reverse Voltage	V_{RM}	4V	4V	4V	4V
Current Reduction Rate Above 25°C	ΔI_F	0.40mA/°C	0.33mA/°C	0.33mA/°C	0.33mA/°C
Ambient Temperature Range		-20°C ~ +50°C		-25°C ~ +50°C	

Super Bright Bicolor LED with 2 Elements

* This number is the Forward Current Value when either color is illuminated (single color illumination). When illuminating both colors, apply the value as the Total Current Value of Red and Green.

Notes

- The LED circuit is isolated and requires an external power source.
- For best results and safe use of the LEDs, the supply voltage should be more than the LED forward voltage. In addition, an appropriately valued ballast resistor should be used. Without the ballast resistor, the LED will be damaged or destroyed. The resistor value can be calculated by using the formula shown here.
- Contact information is below if more details are needed.

$$R = \frac{E - V_F}{I_F}$$

Where: R = Resistor Value (Ohms)
 E = Source Voltage (V)
 V_F = Forward Voltage (V)
 I_F = Forward Current (A)

Effective Date

Changes for UB2 Series Pushbuttons & Indicators with Super Bright Red/Green Bicolor LEDs will be effective April 2026. However, the date may be subject to change depending on inventory of the products.
