The JL Illuminated Tactiles will have a change to the LED specifications for Red, Amber and Green. The change will effect all illuminated models, both standard and custom. The specification changes are outlined below, followed by effected standard part numbers.

LED Changes for JL Illuminated Tactiles

## LED COLORS \& SPECIFICATIONS

| LEDs are an integral part of the switch. The electrical specifications shown are determined at a basic temperature of $25^{\circ} \mathrm{C}$. |  |  | Before Change |  |  | After Change |  |  |

| Notes |  |  |  |  |  |  |  |  |
| - The LED circuit is isolated and requires an external power source. <br> - If the source voltage exceeds the rated voltage, a ballast resistor is required. The resistor value can be calculated by using the formula shown here. <br> - The changes to LED specifications do not effect any external dimensions of the switches. |  |  |  |  |  |  |  |  |

- Contact the factory if further details are needed.
