# Change to B Illuminated Toggles LED Specifications 

Type of Change:
$\boxtimes$ Engineering
$\square$ Part Number
$\boxtimes$ Product $\boxtimes$ Appearance

The B Illuminated Toggles will have a change to the LED specifications for Red, Amber, Green, and bicolor Red/Green. The change will effect all illuminated models, both standard and custom. The specification changes are outlined below, followed by effected standard part numbers.

LED Changes for B Illuminated Toggles

## LED COLORS \& SPECIFICATIONS

LEDs are supplied as an integral part of illuminated devices and are not available separately. The electrical specifications shown here are determined at a basic temperature of $25^{\circ} \mathrm{C}$.

Notes

- The LED circuit is isolated and requires an external power source.
- If the source voltage exceeds the rated voltage, a ballast resistor is required. The resistor value can be calculated by using the formula shown here.
- The changes to LED specifications do not effect any external dimensions of the switches.

Anode

Cathode
$R=\frac{E-V_{F}}{I_{F}}$
Where: $\mathrm{R}=$ Resistor Value (Ohms)
E = Source Voltage (V)
$V_{F}=$ Forward Voltage (V)
$I_{F}=$ Forward Current (A)

- Contact the factory if further details are needed.
